

# 18th & Union

AN ARTS SPACE  
[18thandunion.org](http://18thandunion.org)

**18th & Union** is a 49 seat performance space in Seattle's Central District that serves as a home for portable performance and visual art, including theater, music, dance, comedy, and improv.

*We envision a city where everyone has equitable access to art and community collaboration. Our mission is to sustain an affordable, inclusive, and intimate space that nurtures art and community.*

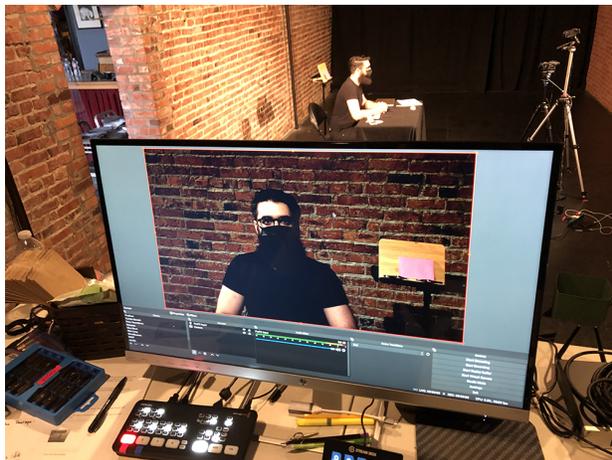

Everyone is welcome at our space. Our lobby space has no steps, and there's one small step down into our theatre space, for which we have a ramp. We're sorry to say that our bathrooms aren't wheelchair-accessible.

# TECHNICAL SPECIFICATIONS

## LIGHTING

ETC Element Board

House Plot - 28 Instruments (24 Fresnels, 4 Source 4s)

- Cool & Warm General Look
- High Sides
- Center Spot
- Back Lights

## SOUND

Mini input directly to the sound board to plug in a phone or other device to run directly to the speakers

MacBook Pro running QLab 4 with pro video and audio license

2 speakers upstage hung on the grid - 800 watts each

2 speakers behind the audience hung on the grid - 200 watts each

subwoofer under the audience risers

1 free standing 200 watt speaker which lives in the green room which can be brought on stage

1 speaker in the concessions area in the lobby

1 open circuit for an additional speaker

Can re-route the concessions speaker to the same channel as a stage speaker and give 1 more open channel.

MICROPHONES:

2 wireless mics. The mics only play through the upstage speakers.

2 Shure SM58 mics.

2 open input channels for additional mics. You'd have to run your own cable to the booth.

Can technically run a mic to any speaker in the house, but that speaker would then be dead to the QLab input.

# LIVESTREAM

2018 era MacMini, running macOS Catalina  
ATEM Mini, 4 camera switcher  
Stream Deck control panel

## CAMERAS:

VIXIA HF R800 HD camcorder  
Cannon XA11 camcorder

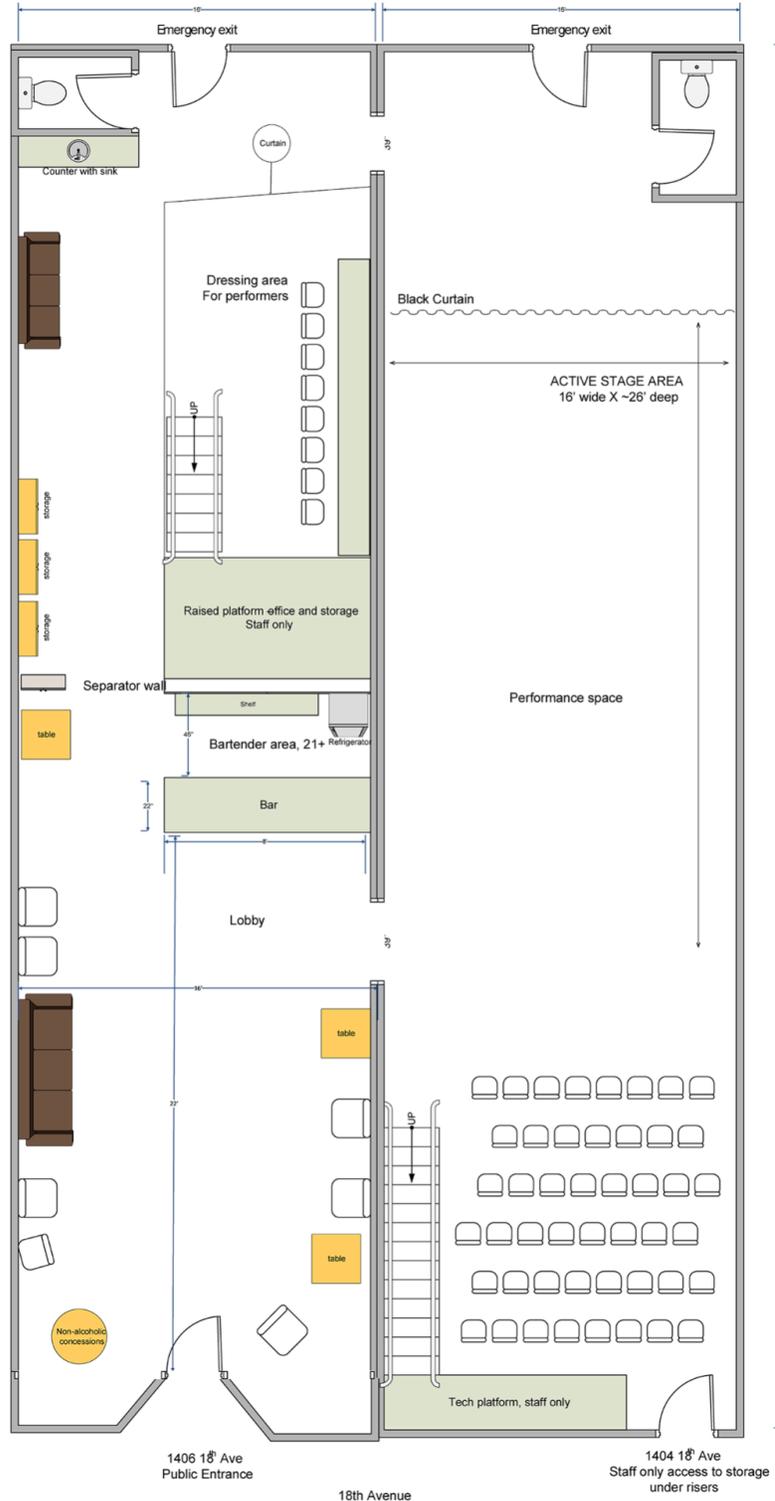

## SOUND:

ProFX10v3 audio board - 10 channels (4 fully EQd)  
2 - Sennheiser ew G4 wireless mics, with over-ear microphones
